1) Write the HTML file to create the below web page.

---

**User Registration Form**

| | |
|---|---|
| **User Name** | Enter your username. |
| **Password** | Enter your password. |

**Country**      ○ India      ○ China      ○ Uk

☐ **Check this to receive an acknowledgement.**

[ **Login** ]          [ **Reset** ]

---

2) When Login button is clicked, it should display an alert message if username/password is empty or country is not selected.
3) When Reset button is clicked, it should clear all the form fields.
